About Me

Final-year AI/ML undergraduate specializing in AI automation systems, LLM applications, conversational AI, and workflow orchestration. Experienced in building production-oriented AI solutions using FastAPI, Python, REST APIs, vector databases, and Gemini/OpenAI integrations. Passionate about solving real-world business problems through scalable AI systems and intelligent automation.

Key Strengths: AI Automation • LLM Integration • Backend APIs • Workflow Engineering • Product Thinking

Education

AMC Engineering College, Bangalore, Karnataka Dec 2022 – May 2026
BE in Artificial Intelligence and Machine Learning, CGPA: 8.9/10

Skills

Programming: Python, JavaScript, SQL, HTML, CSS

AI/ML: Machine Learning, NLP, LLM Applications, Prompt Engineering, Conversational AI, RAG, TensorFlow, PyTorch

Backend & APIs: FastAPI, REST APIs, API Integrations, Workflow Automation, n8n

Databases & Cloud: PostgreSQL, Supabase, Firebase, Qdrant, GCP

Tools: Git, GitHub, Postman

Experience

- Technology Consultant Intern, InferWorks – Bangalore** Feb 2026 – Present
- Evaluated and optimized enterprise AI chatbot systems for workflow efficiency, response quality, and business automation use cases.
 - Supported deployment and testing of AI-driven reporting, lead generation, and operational automation workflows.
 - Built and integrated API-driven automation pipelines, contributing to a 30% reduction in reporting turnaround time.
 - Collaborated with cross-functional teams to improve enterprise AI system reliability and automation performance.
- Web Development Intern, VisionAstraa Startup Academy – Bangalore** Aug 2024 – Apr 2025
- Built and deployed responsive production websites with 95%+ mobile compatibility.
 - Improved frontend performance and optimized page load speeds through UI optimization.

Projects

- FOSYS – AI Workspace Management Platform** GitHub
- Engineered an AI-powered workspace management platform integrating task automation, GitHub synchronization, and meeting intelligence.
 - Developed scalable backend using FastAPI, PostgreSQL, Supabase, and REST APIs for real-time collaboration.
 - Implemented AI-based transcript analysis and automated task extraction pipelines, reducing manual coordination efforts by 30%.
- VoxFlow AI – Conversational AI Workflow Assistant** GitHub
- Built a conversational AI assistant with vector retrieval pipelines, and workflow automation capabilities.
 - Integrated Gemini APIs, FastAPI, and Qdrant to support intelligent scheduling, and contextual task execution.
 - Developed modular LLM orchestration pipelines for scalable voice-first AI interactions.
- RevenuePilot AI – Multi-Agent AI Workflow System** GitHub
- Developed a multi-agent AI strategic consulting workflow platform for automated revenue analysis and executive reporting workflows.
 - Built automation pipelines integrating Gemini APIs, Gmail automation, Google Sheets, and PDF generation systems.
- Fake News Detection System** GitHub
- Developed a multimodal AI pipeline integrating NLP, OCR, speech recognition, and Gemini APIs for misinformation classification.
 - Implemented text extraction using Tesseract OCR and speech-to-text workflows using Vosk for multimedia input processing.

Publication

Fake News Detection: An AI-Based Approach

Published in JETIR Journal of Emerging Technologies and Innovative Research (JETIR2506313)

Achievements

- Best Paper Award – IC-AISMART 2025** for FOSYS AI Workflow Automation System
- 1st Place – Code-6-Craze Hackathon**
- 3rd Place – Algo-Arena Hackathon**
